

Italian Cream Ag+

Description

Soft cream designed to clean, polish and protect the most exclusive classic varnished wood instruments, such as violin, viola or cello. Removes prints, dust and dirt while enhancing the beauty of the instrument.

Italian Cream Ag+ protects from microorganisms which occasionally could be deposited on the instrument surface. Indeed, the product contains some components which inhibit and prevent the survival of microorganisms on the surface. This protective barrier is permanent while the product is on the surface.

Composition

Italian Cream Ag+ has been formulated with top-quality raw materials and pretending the minimum impact on health and the environment.

This product does not contain silicones, abrasive components, heavy oils and heavy solvents.

The silver ions content enables the product to prevent the development of microorganisms on the surface where it's applied. This assures the correct hygiene for the instrument.

The ionic silver is a power antimicrobial agent with a broad spectrum and tested efficiency against the most usual microorganisms such as bacteria, virus, fungus and protozoans.

The optimum balance on its components provide good cleaning and leaves a thin layer on the surface which enhance the beauty and protects the instrument for a longer period.

Properties

Cleaning and protection of classical varnished wood instruments.

Improving instrument's hygiene and preventing microorganisms such as bacteria and virus.

High viscosity creamy liquid

Yellow

Solid matter: 70% approx.

Flashpoint: Non-flammable.

Easy application properties.

Low odour.

Antibacterial properties Certificate according to the Japanese Industrial Standard JISZ 2801 /ISO 22196, Test for antibacterial activity and efficacy.

Use

For the correct instrument's cleaning, we highly recommend removing any dust from the area where the product will be applied.

Put some drops of the product on lint-free clean cotton or microfiber cloth. Spread it over instrument's surface while applying a small amount of pressure. Rub in small circular movements. Finally, rub gently with a clean cloth until no visible residues are left.

You must clean your instrument with the **Italian Cream Ag+** after every use or after a deep cleaning or restoration.

Storage

Keep the bottle well closed in a fresh area. Sources of heat, radiation, electricity and contact with food should be avoided.

According to the CLP Regulation n°1272/2008 (CLP), the product is not classified as hazardous.

Safety

Non-flammable product.

The product does not require special handling measures, but the following general measures are recommended: use protective gloves and glasses against accidental splashes.

The product is not classified as dangerous for the environment.
Do not dump into sewers or waterways.
